

Human Body Exhibit

Your assignment is to select one part of the body from the list below and to create 3 -D model. You will also need to include a one-page report on the part following the rubric below.

Choices:

- The ear**
- The eye**
- A nerve cell**
- A hinge joint**
- Lungs**
- The heart**
- The brain**
- The spine**
- A cross section of skin**
- The digestive system**
- A ball and socket joint**
- The arm with flexor and extensor muscles**

You will need to email me at normlinda@gmail.com with your top three choices. Emails will be viewed in a first come, first served basis starting on April 13 at 10:30.

Grading Rubric:

	1	3	5
Model:	-----	-----	-----
Neat			
3-D (no posters)			
Accurate			
Labeled correctly			
Paper:	-----	-----	-----
Typed and in MLA format			

	1	3	5
First paragraph: Introduces the body part and includes a thesis			
Second paragraph: Discusses the body part, where it is in the body, identifies the organ system, its size, and other physical attributes			
Third paragraph: Discuss how the body part works And its importance			
Fourth paragraph: Discusses problems or diseases associated with this body part
